AIDPORTFOLIO

Project portfolio management solution

The AidPortfolio solution is designed to support you during the different project cycle phases, from the initial selection up to the final evaluation of projects.

AidPortfolio is a tool used to harmonize project monitoring processes and measure the performance and the impact of a portfolio.

AID SOLUTION

Our Aid solutions are designed to be customizable and modular so they meet your specific needs.

Implementation of a customized solution comprises a comprehensive service: needs analysis, specific configurations, links with existing systems, data import, roll-out and training.

MANAGE ACTIONS AND PROJECTS

- ✓ Identify projects to finance
- ✓ Fill in the logical framework for implemented projects
- ✓ Generate schedules and reverse schedules for your activities
- ✓ Monitor the technical, administrative and financial progress of your projects

MANAGE RELATIONS WITH STAKEHOLDERS

- ✓ Manage and classify the contacts involved in your projects
- ✓ Manage and communicate with your network
- ✓ Keep a record of interactions with stakeholders

PLAN AND MONITOR BUDGETS

- Plan and monitor your projects' commitments and disbursements ✓
- Manage the various currencies and exchange rates ✓
- Manage the provisional budget by year, partner, country, etc. ✓
- Consolidate information with your accounting system ✓

MONITOR, EVALUATE AND PUBLISH DATA

- Define qualitative and quantitative indicators ✓
- Collect and compile indicators: using PDF forms, web forms, SMS, etc. ✓
- Check and validate data consistency ✓
- Generate reports (strategic, operational, monitoring, etc.) ✓
- Create interactive maps ✓
